

Assignment

Create simple UI with two separate button “Connect to Goggle Drive” and “Add Attachment” in ReactJS where user can select File from Google Drive or Local drive. System should take user to respective drive and allow to select single file (any format). Once file selected display that file name and drive type to landing page

Use MaterialUI library for UI. Assume user already have Google Drive account. Use drive integration package/API of your choice

Any user who have valid Google Drive should be able to select file and system should display selected file on main landing page.

After clicking “Connect to Google Drive” system should Connect with connect to Google Drive

Once Connected button “Connect to Google Drive” change label to “Logout - Google Drive” after clicking to Logout button user should be disconnected from Google Drive and button should be changed back to “Connect to Google Drive”

Create simple back end where uploaded files will be stored. Use NodeJS and MongoDB

Browse this computer

Browse Google Drive

Connect to Google Drive
